

**Supreme Court  
1 First Street NE  
Washington DC 20543**

**EXHIBIT  
(Formerly Exhibit 3 In Previous Case)**

**IVIG Denial and False Claim by Commonwealth of Kentucky  
and CHFS of No Appeal Submission January 10, 2025**

This exhibit documents the Kentucky Department of Medicaid Services' denial of intravenous immunoglobulin IVIG therapy despite the submission of irrefutable medical evidence and a timely formal appeal. The denial, issued on or around January 10, 2025, falsely asserts that no appeal was submitted a claim which is demonstrably untrue, as the appeal was completed, submitted within the required time-frame, and acknowledged elsewhere in the record.

This exhibit demonstrates procedural FRAUD and a systemic denial of the right to appeal life-saving medical care.

As a federally protected ADA accommodation, I require that all communications be provided in writing due to ongoing worsening processing issues due to disability related to severe progressive neurovascular-immune disease. Also because of ongoing mail tampering, I request the same, in writing, but in duplicate forms as in email and fax and only in electronic means, to help prevent further additional undue burden on me, as a disabled participant trying to find any path to the possibility of justice when all have been closed off unlawfully and without due process to this point.
